

2009 SUMMARY REPORT

Commercial Feed Inspections

PLANT INDUSTRIES DIVISION
BUREAU OF FEED AND SEED

Missouri Department of Agriculture Mission Statement

To serve, promote, and protect the agricultural producers, processors,
and consumers of Missouri's food, fuel, and fiber products.

Bureau of Feed and Seed 2009 Feed Program Review

The Missouri Department of Agriculture, Plant Industries Division, Bureau of Feed and Seed is pleased to supply this 2009 Summary Report of Commercial Feed Inspections. It is hoped this summary will be used as a reference and will be of help in making improvements to your products.

Food safety issues continued to play a very important role in the Feed Program in 2009. To that end, Missouri Department of Agriculture, Bureau of Feed and Seed Inspectors have undergone training and become certified as Federal Department of Agriculture BSE Inspectors. These inspectors are charged with the task of providing inspection and surveillance for the BSE – Bovine Spongiform Encephalopathy (Mad Cow Disease) - Prevention Program. We continue our concentrated effort to ensure all facilities in Missouri that manufacture and/or distribute feed products containing prohibited mammalian protein were labeled as “Do Not Feed to Cattle or Other Ruminants”, in compliance with Federal Rule 21 CFR Part 589.

The Bureau of Feed and Seed, in cooperation with the Plant Pest Program and the USDA, obtained samples from Missouri’s 2009 wheat production that were tested for karnal bunt wheat disease. No evidence of karnal bunt was found in Missouri.

The Bureau of Feed and Seed conducted an annual survey of corn produced in the state. Corn was tested for crude protein and aflatoxin. If a sample of corn was found to contain aflatoxin, the level and FDA guidelines for safe use or disposal were sent immediately to the facility where the sample of corn was obtained. The 2009 corn results are reported in this summary.

The Bureau of Feed and Seed has continued performing GMP (Good Manufacturing Practices) inspections of non-federally licensed medicated feed manufacturing establishments. We also have contracted with FDA to perform Federal GMP inspections in Missouri. Fifteen GMP inspections were performed by our staff in 2009. These inspections are a vital part of our food safety initiative for all animal feed. It is essential that animal feed is safe to ensure the safety of food for human consumption. The program is intended to ensure legally approved levels and combinations of drugs and antibiotics are used in feed products and that the overall upkeep, housekeeping, records, labeling, and cleanliness of the facility are in order.

The Bureau of Feed and Seed maintained a 100 percent follow-up rate by immediately responding to customer complaints. When problems were suspected that were beyond the scope of the feed program or the capabilities of the Missouri Feed Control Laboratory, other agencies were contacted or the samples were sent to other laboratories for testing.

The Bureau of Feed and Seed took regulatory action against a number of unlicensed companies or those who failed to file tonnage reports. These actions are reported in “Violations Other Than Failure to Meet Label Claims”.

The Missouri Feed Control Laboratory reported results on 5,158 official samples in 2009. An official sample is a product or feed ingredient on which a guaranteed analysis is required. Should a product fail to meet a guarantee or something of a detrimental nature is found, a Withdrawal from Distribution Order is issued immediately. There were 924 withdrawals issued in 2009 which resulted in a statewide compliance rate of 82.09%.

The Missouri Feed Control Laboratory analyzed 29 customer-formula samples in 2009. No regulatory action is taken against these feeds, however, the customer requesting the feed and the manufacturer of the feed received a report of the analysis. In addition, the customer received a questionnaire to ensure the quality of feed requested was received.

A total of 264 service and complaint samples were analyzed in 2009. The total number of samples analyzed by the Missouri Feed Control Laboratory was 5,464 resulting in 54,745 individual assays in 2009.

The Excellence in Compliance Award Program was continued in 2009. A total of 93 guarantor companies qualified for this award.

Our goal has been, and will continue to be, to serve, promote, and protect our agricultural producers, processors and consumers of Missouri’s food, fuel, and fiber products.

**PLANT INDUSTRIES DIVISION
BUREAU OF FEED AND SEED
PERSONNEL & INSPECTOR AREAS**

Judy Grundler, Director, Plant Industries
Tony L. Claxton, Program Manager, Bureau of Feed and Seed

Federal BSE-GMP Agreement

The Missouri Department of Agriculture, Bureau of Feed and Seed has entered into a cooperative agreement with the U.S. Food and Drug Administration (FDA) to do federal Bovine Spongiform Encephalopathy (BSE) and Good Manufacturing Practices (GMP) inspections. All five of our inspectors are trained and certified to perform inspections as Federal Department of Agriculture BSE Inspectors.

The most recent contract period ran October 1, 2008 – September 30, 2009. During that time, 244 BSE Federal inspections were performed in Missouri with that information forwarded to the FDA office in Kansas City. In addition, 15 Federal GMP inspections were conducted in Missouri.

U.S. Food and Drug Administration Guidelines for Aflatoxin Levels

Corn containing less than 20 parts per billion aflatoxin is considered safe by the U.S. Food and Drug Administration for use in all animal feed. Corn exceeding 20 ppb can be fed only for specific age, weight, and production stage. Corn exceeding 300 ppb must be blended with corn containing little or no aflatoxin before feeding is allowed to specific age, weight, and production stage of livestock. Before corn can be blended for out-of-state shipment, the U.S. Food and Drug Administration must be notified and permission obtained from the Missouri Department of Agriculture for this to be allowed.

U.S. Food and Drug Administration guidelines are as follows:

Aflatoxin Level (in parts per billion)	Commodities & Species
20 ppb	For corn, peanut products, cottonseed meal and other animal feeds and feed ingredients intended for dairy animals; for animal species or uses not specified below, or when the intended use is not known.
20 ppb	For corn, peanut products and other animal feeds and feed ingredients, but excluding cottonseed meal, intended for immature animals.
100 ppb	For corn and peanut products intended for breeding beef cattle, breeding swine or mature poultry (e.g. laying hens).
200 ppb	For corn and peanut products intended for finishing swine (100 pounds or more).
300 ppb	For cottonseed meal intended for beef cattle, swine or poultry (regardless of age or breeding status).
300 ppb	For corn and peanut products intended for finishing beef cattle (i.e., feedlot cattle).

2009 Corn Survey

The Missouri Department of Agriculture is happy again to report the results on our annual monitoring of aflatoxin in corn. This survey has been reported yearly since 1993. We also analyze all customer complaint samples for aflatoxin when symptoms suggest adulteration. Laboratory tests are conducted to determine the average crude protein in corn. In 2009, the average crude protein for corn was lower at 7.23%. Each sample was adjusted to a 13.5% moisture level. This year we did not sample or analyze milo.

Samples of corn are drawn from counties having an expected production of greater than 1.5 million bushels, with one sample added for each additional two million bushels produced. Aflatoxin was found in 5 of the 193 samples tested. The values reported were in a range from 10-300 ppb. Each time aflatoxin was found, the facility where the sample was taken was notified immediately and FDA guidelines for safe use or proper disposal were supplied.

The Missouri Department of Agriculture is committed to food safety and quality for the protection of our state's consumers. Our mission is to continue to serve, promote, and protect the agriculture producers, processors and consumers of Missouri food, fuel and fiber products.

2009 STATISTICAL SUMMARY

Total Number of:

Commercial feed licenses issued	1,770
Small package pet and specialty pet food products	6,104
Unpaid products over the maximum fee per labeler	139
Formula feed sold (tons)	1,568,162
Feed ingredients sold (tons)	4,721,357
Feed inspections by inspectors*	1,456
Official labeled samples	5,158
Guaranteed claims tested and reported	26,535
Non-guaranteed claims tested and reported	3,292
Withdrawal from distribution orders issued	924
Custom mix samples	29
Nutrients tested and reported	169
Service samples	264
<u>Nutrients tested and reported</u>	<u>752</u>
TOTAL SAMPLES TESTED	5,451
TOTAL VALUES REPORTED	30,925
TOTAL TESTS PERFORMED	54,745

*A feed inspection is defined as one inspection for each facility visited where a “notice of inspection” is written indicating the type of regulatory action taken.

Excellence in Compliance Award

The Excellence in Compliance Award is designed to recognize those companies who have high standards and have met or exceeded a 90 percent rounded average compliance in 2009.

The Missouri Department of Agriculture will issue a certificate to honor those companies that have met or exceeded the following criteria:

- At least five random official regulatory samples must have been taken by a Missouri Feed and Seed inspector and been analyzed by the State Feed Control Laboratory in 2009.
- A 90 percent passing compliance rate on five or more samples must have been achieved for the 2009 calendar year.
- The company labeling the feed or feed ingredient must be in good standing with the Bureau of Feed and Seed retain a Missouri Commercial Feed License and have all quarterly inspection fees or yearly product listing (pet and specialty pet foods) paid as required.

A total of 93 feed labelers have achieved a 90 percent or better compliance rate in Missouri in 2009.

Fifty-eight of these companies maintain an address in the state of Missouri and 35 are located outside of Missouri. A number of companies with out-of-state addresses have manufacturing facilities in Missouri.

Congratulations go to the following companies in alphabetical order:

SECTION 1

Section One is intended to show the reliability of labelers in meeting their claims for feed quality. Inspections were planned on a random basis. The greater the number of samples taken per labeler, the greater the probability that the consistency in meeting claims shown will represent how well the labeler met guarantees.
